Dear Nick,

Thank you for submitting your Impulse laser measure to the National Officiating Advisory Group (NOAG) for approval.

I am pleased to advise that the determination of NOAG is that your laser measure *Impulse* is approved for use in Australia. NOAG has found your laser measure to be compact and efficient, and suitable for both players and officials for use in pennant, zone, region or division competition.

The device should not be altered by the end user and if this can be specified during any receipt for purchase that would be appreciated.

This approval holds no bearing on any product warranty – which remains the responsibility of the manufacturer. Furthermore, any potential issue with regard to patent laws and all liability remains with the manufacturer.

On behalf of NOAG and Bowls Australia, please accept our congratulations on your product. We believe it will prove to be a useful addition to the tools for umpires, officials and players in our sport.

Yours sincerely

Neil Dalrymple
Chief Executive Officer
